

Oprah Non-Surgical Face-Lift

Bio-Therapeutic featured on **Oprah**: Bio-Therapeutic's microcurrent unit, the Bio-Ultimate Gold™, was recently featured on an episode of "**Oprah**". A Bio-Ultimate microcurrent treatment was performed during a feature titled "Look 10 years younger in 10 days". Microcurrent aids in reducing the signs of aging by performing a non-surgical face-lift and diminishes the appearance of fine lines and wrinkles by utilizing a low level of electricity known as microcurrent. These tiny microcurrent impulses trigger chemical reactions at a cellular level to enhance the production of natural collagen and elastin, provide circulatory benefits, and assist in product penetration (iontophoresis). The result is visible firming and smoothing of the skin. Clinicians can also sculpt and contour the face and body through non-surgical muscle re-education.
